

REGULATION ErP WE ARE READY TO START WITH HIGH-EFFICIENCY PUMPS AND AFFORDABLE PRICES

ErP Regulation (Energy related Products) translates as energy-relevant products. The objective of this Regulation, 2009 125 EC is to reduce energy consumption in accordance with the environmental requirements and it is being introduced in the EU in the field of circulation pumps in 2013. In the course of the next seven years the Regulation will be put in practice in the following three steps:

- The first step from 01/01/2013 for the energy index up to (max.) 0.27
- The second step from 01/08 in 2015 for the energy index up to (max.) 0.23
- The third step from 01/01/2020 for the energy index up to (max.) 0.23 – including the pumps, which are being replaced in HVAC systems

The benchmark for most efficient circulators is $EEI \leq 0,20$.

The IMP PUMPS meet environmental requirements in accordance to ERP Regulation with high-efficiency pumps with affordable prices.
